Mesothelioma Fund

At the Mesothelioma Fund our mission and primary focus is to support mesothelioma victims and their families through their journey. We help through communication, compensation and care. We have partnered with medical experts to provide clients with information kits about the disease, treatments and financial options. We also help asbestos-exposure victims determine the sites and years of exposure, obtain the necessary physician certifications, and secure the critical documentation to ease the process of asbestos bankruptcy trust claims. We have worked collaboratively with the leading physicians and cancer centers in the country so our patients can have access to cutting-edge treatments and pioneering clinical trials.

Public Heath Degrees

Public Health Online is dedicated to those researching educational opportunities within public health to help make the decision to get a degree, go back to get a degree, or further their education with a master’s or doctoral degree in public health. We also offer a variety of resources to include mental health topics and nicotine and vaping cessation.
