

Examples of public involvement in studies funded by NIHR Evaluation, Trials and Studies Programmes

A series of examples of public involvement in studies funded by the NIHR Evaluation, Trials and Studies Programmes

Example one: Preventing depressive relapse in NHS Practice through mindfulness-based cognitive therapy (MBCT)

Example two: Transitions to palliative care for older people in acute hospitals

Example three: Evaluating Acupuncture and Standard care for pregnant women with Back pain (EASE Back): a feasibility study and pilot randomised trial

Example four: Health-Related Quality of Life in two treatment pathways for primary open angle glaucoma and ocular hypertension: a randomised controlled trial of initial selective laser trabeculoplasty versus conventional medical therapy

Example five: Outreach programmes for health improvement of Traveller communities: a synthesis of evidence
