

About the database

Welcome to the INVOLVE research project database

The aim of the database is to provide a resource of published and unpublished research projects in the field of health, public health and social care that have or plan to actively involve members of the public as partners in the research process.

Each entry has been written by the individual research project and includes details of the projects' aims, methods, research design and the ways in which members of the public have been involved. Contact details are supplied for you to find out further information on any of the projects that might be relevant or of interest to you.
